

FREE INFORMATION SESSION

Learning Difficulties, Autism, ADHD, Stroke, Cerebral Palsy and PTSD

Therapy Success is dedicated Helping Children and Adults find Success in the puzzles of Life, Learning and Movement . Specialists work with a variety of conditions, from **Autism, ADHD, Stroke, Learning Difficulties, Cerebral Palsy and PTSD**. The main technique used is Masgutova Neuro-Sensory Motor Reflex Integration (MNRI), formulated by Russian psychologists, Svetlana Masgutova as a result of extensive research.

In this brief presentation David will outline the basic principal of MNRI, how unintegrated reflexes impact on our everyday function and learning. Colleen-Maree will demonstrate some MNRI movements and be available for questions.

David has travelled to the USA and Indonesia to study MNRI. He has travelled to the Philippines with the MNRI International PTSD Team to assist group of Occupational Therapists providing trauma relief for typhoon victims. David also teaches young adults who are from trauma backgrounds.

Colleen-Maree is the only Level 3 Masgutova Specialist in Australia and has had the privilege of working alongside Dr Svetlana Masgutova at 2 family conferences in USA. Colleen-Maree has been working with children and adults with challenges for over 15 years.
